## Experience

### PETE – Porto, Portugal
*Jun 2022 - Dez 2025*

**Senior Software Engineer**

**Tech Stack:** Koa, NextJs, NuxtJS, MongoDB, Postgres, AWS, Azure, QwikJS, Redis

- Contribute to the development of a web application that manages master data across multiple energy parks, improving data consistency for both operational and analytical teams. Implemented features for user permission management, budget calculation, and integration with warehouse systems, reducing manual data handling by 80%.
- Collaborated on the architecture and development of a web solution to digitize the recycling process of construction materials, integrating an OCR system to automate data capture and reduce processing documents from weeks to hours.
- Delivered proof-of-concepts, Websites for gathering leads that helped stakeholders to understand the market, and internal tools that improved project observability.

### Bolttech - Porto, Portugal
*Mar 2021 - Jun 2022*

**Software Engineer**

**Tech Stack:** Go, Polymer, NestJS, MongoDB, RabbitMQ, Redis, Jenkins

- Developed and optimized features for insurance products, enhancing user experience and expanding the platform's service capabilities.
- Supported the improvement, structuring, and deployment of multiple microservices, improving system scalability and reliability by implementing standardized integration patterns.
- In charge of configuring the Subscription service in multiple brokers, ensuring the renewal of insurance policies.

### Upplify Inc. - Paraíba, Brazil
*Nov 2018 - Mar 2021*

**Software Engineer**

**Tech Stack:** AngularJS, Angular 4+, NodeJS, Azure

- Maintained and expanded applications built with both monolithic and microservices architectures, improving modularity and maintainability
- Migrated a Payment gateway service from a monolithic to a microservice-based architecture while ensuring backward compatibility.
- In a Rental marketplace, my main work was to integrate Stripe for installment and one payment method. Additionally, delivered various features.

### Lumenbox - Paraíba, Brazil
*Jul 2018 - Oct 2018*

**Junior Developer**

**Tech Stack:** Angular 6, Firebase

Responsible for the development of a single-page web application to manage and visualize user data from an educational mobile app, improving data accessibility for the project.

## Education

**Computer Science Degree**
Universidade Estadual da Paraíba - 2018

## Summary

Senior Software Developer with over 7 years of experience designing and delivering high-quality web and mobile applications. Skilled in system development, architectural design, and technical leadership. Proficient in JavaScript and Node.js, with hands-on experience in modern frameworks and libraries, including Angular, React, Vue, and QwikJS. Also experienced in building mobile applications with Flutter and implementing DevOps solutions using AWS, Azure, and Firebase.

## Skills

### 🖥️ Backend & DevOps

| | |
|---|---|
| NodeJS | Docker |
| Go Lang | RabbitMQ |
| MongoDB | Firebase |
| SQL | AWS |
| Redis | Azure |
| Postgres | Jenkins |

### 💻 Frontend

Angular    ReactJS    Vuejs    Qwik

### 📱 Mobile

Flutter

## Languages

| | |
|---|---|
| Portuguese | **Native** |
| English | **Advanced** |
